Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 9, 11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walmsley et al. (US Patent No. 5,207,429) in view of Cornett (US Patent No. 5,465,972).

With regards to claim 1, Walmsley discloses a device comprising:

- A turret (17) including a laser emitting aperture;
- A body having an axis (19), the turret being axially rotatably affixed to the body;
- A lockable articulated support arm (33, see column 5, lines 12+) projecting radially from the body;
- A clamp (31) for attaching the arm to a putter shaft; and
- The articulated arm being adjustable (33, see column 5, lines 12+).

With regards to claim 11, Walmsley discloses the invention as recited above including means for both locking and clamping and arm (when referring to Fig. 5, item 38 is used similar purpose).

Walmsley discloses the invention as recited above but fails to teach the use of a remote switch. However, Cornett teaches the use of a remote switch (28). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a

application/Control Humber: 10/004;00

remote switch as taught by Avanzini in the Walmsley device in order to allow the golfer to turn on or turn off the lighting mechanism conveniently, easily, and as needed basis.

With regards to claims 9 and 13, Cornett discloses a remote switch (28) that is removably attachable the grip of a putter (see Fig. 1).

Allowable Subject Matter

Claims 2-8, 10, 12, and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nini F. Legesse whose telephone number is (703) 605-1233. The examiner can normally be reached on 9:30 AM - 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vidovich Greg can be reached on (703) 308-1513. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you
